Dewsoft
ᙖB Business Backbone
e-business suite

Impossible is just a BIG word thrown around by small
men who find it easier to live in the world they've been
than to explore the power they have to change it.

Impossible is not a fact.
"It's an opinion"

Impossible is not a declaration.
"It's a dare"

Impossible is potential.
"Impossible is temporary"

"Impossible is nothing"
 ᙖB *making everything possible!*

Dewsoft
s o l u t i o n s

Dewsoft Solutions is part of a putative Business Group in India engaged in various manufacturing, trading & consulting activities.

With a clear focus on identified industry domains and consistency of delivery, Dewsoft has carved a niche in the IT Solutions and Services Industry.

The Internet, deregulation, globalization, consolidation and the volatility of a global economy and factors in cross-industry convergence & mergers challenges our clients' industries, resulting in new value propositions and moneymaking formulas.

To turn them to advantage in an industry with unbounded potential is sheer understanding.

Pledge to serve you better, will work hard to earn your confidence and would be, striving for excellence.

e - Business Solutions

At Dewsoft solutions, when we engineer generic business solutions for a client, we look at it from a business perspective, not a software perspective, and exactly there lies the key. For in doing so, we transgress software development and enter the realm of business application development. It is this clear understanding that has guided us towards success, both for our clients and for us.

vision

" To create delighted clients and become a globally respected corporation that provides best business solutions by leveraging technology and human assets. "

mission

" To create a fair and honest environment in the organization, which would drive our employees, vendors, clients and society at large towards achieving our vision. "

values

- **Responsibility** - In what we deliver.

- **Excellence** - continuously we crave for.

- **Innovation** - Keeps on continuously improving our quality.

- **Teamwork** - Has been a key to Success.

- We grow with **Mutual respect** and **Mutual Understanding.**

Concept of Multiplying Profits

Max. Profit = Improve Quality of Product or Services
+
Reduce the cost of Production
+
Optimum utilization of the Resources

Follow Quality Standards like ISO, Six Sigma etc.

- Better quality fetches better price and so the profits.
- Better quality improves the goodwill of the product and the company.
- Can Capture higher market share.

Reduction in Cost of Production can be possible through

- Proper Planning.
- Right Decision at right time.
- Increase the productivity.

Optimum utilization of the Resources can be possible through

- Getting right information at right time.
- Implementing planning concepts like Bill of Material (BOM) etc.
- Accepting and implementing latest technologies.

What is ERP?

Enterprise Resource Planning (ERP) is a concept which helps the management to plan and manage the basic functions of their business, economically and efficiently, such as Finance & Accounting, Manufacturing, Inventory control, Human Resources planning, Sales & Marketing, Customer Relations Management, etc., in order to maximize the productivity and thus profits.

Why to use ERP?

Day by day market territory is increasing. Now whole world has become a single market, and so the market calculations are changed a lot. Today you just don't have to compete with the local competitors, but also face the international competition. In order to do that, you are required to take right decision at right time. Right decision can be taken only if you have right information. To get right information on time, you need to computerize the whole system, where ERP softwares integrates with all the Departments and Functions of the business and extract required Managerial Information System (MIS). It also test accountability, responsibility and communication at each level of the hierarchy.

How to use ERP?

Normally ERP demands change in the working style hence high level of people co-operation is required. So it is always advisable to implement ERP in a phased manner along with your existing system. Proper manpower training is required for running the ERP software successfully. You just get associated with the DEWSOFT SOLUTIONS PVT. LTD. and everything will be taken care off.

" Winners don't do different things,
They do things differently."

-Shiv Khera
