“Humans are the precious creation of God,
Hospitals take care of them,
We are standing between the two”

Smartcom Infotech is part of a putative Business Group in India engaged in various manufacturing, trading & consulting activities.

With a clear focus on identified industry domains and consistency of delivery, Smartcom has carved a niche in the IT Solutions and Services Industry.

The Internet, deregulation, globalization, consolidation and the volatility of a global economy and factors in cross-industry convergence & mergers challenges our clients' industries, resulting in new value propositions and moneymaking formulas.

To turn them to advantage in an industry with unbounded potential is sheer understanding.

Pledge to serve you better, will work hard to earn your confidence and would be, striving for excellence.

e - Business Solutions

At Smartcom Infotech, when we engineer generic business solutions for a client, we look at it from a business perspective, not a software perspective, and exactly there lies the key. For in doing so, we transgress software development and enter the realm of business application development. It is this clear understanding that has guided us towards success, both for our clients and for us.

vision

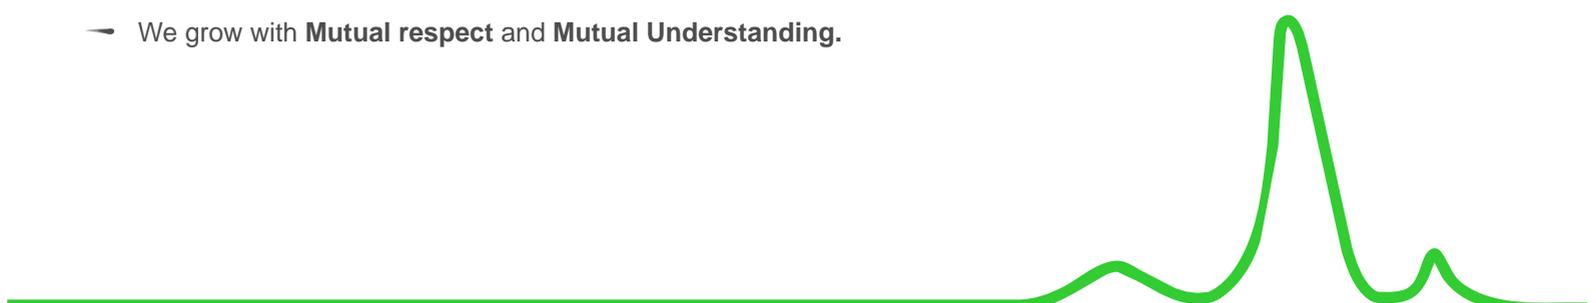

“ To create delighted clients and become a globally respected corporation that provides best business solutions by leveraging technology and human assets. ”

mission

“ To create a fair and honest environment in the organization, which would drive our employees, vendors, clients and society at large towards achieving our vision. ”

values

- **Responsibility** - In what we deliver.
- **Excellence** - continuously we crave for.
- **Innovation** - Keeps on continuously improving our quality.
- **Teamwork** - Has been a key to Success.
- We grow with **Mutual respect** and **Mutual Understanding**.

“ Life is really **simple**
but **we make it** Complicated ”

Hospitals are not merely profit making organizations, more over they have the responsibility of taking care of human health. Since they provide prestigious service, they have a higher value in the society. **Health care** services value has become prime factor in hospital management.

Proper co- ordination of resources like man, machine, money and material is required to maintain a superior quality in services rendered. The Enterprise Resource Planning (ERP) tool called **Hospital Cura** developed by Smartcom Infotech is an ideal package for integrating an entire healthcare organization. We serve you better, because we know you better.

Healthcare providers usually face the challenge of minimizing cost without compromising the quality of services. Since hospitals are concerned with the life of the patients, any small error can lead to an irrecoverable loss- we know these facts better than anyone else, that's why utmost care is taken in preparing this ERP solution for hospitals.

In this era of globalization, cut-throat competition is going on in healthcare industry, so healthcare organizations has to formulate right strategies at the right time and at economical cost for survival. The long-term success of a healthcare organization depends upon its ability to deliver best services with care at the right price and by maintaining financial health through operational efficiencies.

It can be achieved only through a single, reliable computer based information system just like '**Hospital Cura**' of Smartcom Infotech. Better clinical outcomes and reduced medical errors are highly dependent on clinical information systems, which provide decision support and automate process tools capable of improving care-giver's productivity. Our primary objective is to make you prepared for facing the competition.

Hospital performance is judged by the patient or relatives depending on their efficiency i.e. the success rate and cost effectiveness of the hospital.

? How to improve the Efficiency and at the same time to become cost effective?

- **Improved Quality for Patient Care.**
- **Minimized diagnosis time.**
- **Increased Doctors & Nurses Productivity.**
- **Optimum use of Equipments (Resources).**

Improved Quality for Patient Care.

Improved Quality of patient care spreads word of mouth. It helps hospital in creating goodwill in the society.

Minimized diagnosis time.

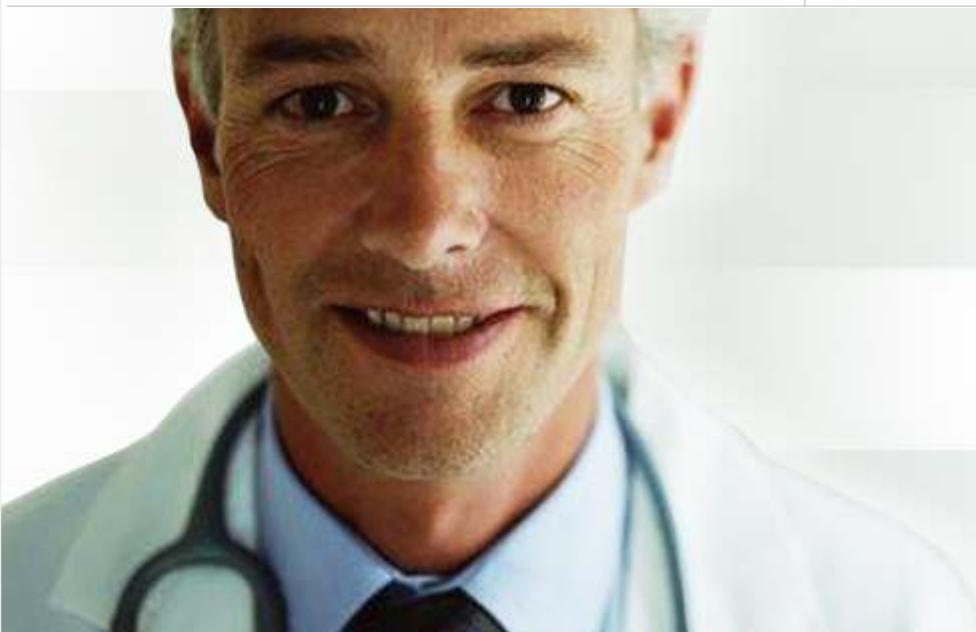

By minimizing diagnosis time hospital demonstrates quality of patient care and even it helps hospital in improving the success-rate. Faster the diagnosis, faster the treatment starts that improves recovery of the patient's health.

Increased Doctors & Nurses Productivity.

Here Doctors and Nurses productivity doesn't mean that how many patient they handle in a day. But it means how efficiently and effectively they treat a patient. It also deals with the accuracy of the treatment in a stressful situation. In fact Doctors and Nurses are directly responsible to the success-rate of the hospital.

Optimum use of Equipments (Resources).

Optimum use of equipment (resources) is required to minimize the cost of services that will help hospital to charge lesser fees for different services. Patients also judge hospital on cost of treatment, they always keeps on comparing cost of treatment with other hospitals.

what is..

We understand how difficult it is to be efficient in today's world, so we are providing a solution to **make you efficient.**

- Smartcom Hospital Cura is not just Enterprise Resource Planning Software but it helps management and doctors to take informed, fast and right decisions in all the functions of the management.
- When you take informed, faster and right decisions you become efficient.
- Latest technology, if used in the right sense, always increases the efficiency level. Our continuous endeavor is to improve the management efficiency level.
- Smartcom Infotech have studied the Hospital management process in micro details and it is observed that 50% of any Hospital deals with documents, which consumes maximum of time.
- Documentation though an important part of business, is a non-productive exercise for the intellectual human being, whose ability lies in core areas of excellence. Hence a proper document management system in place will reduce the burden on your system and not only make-work easier & quicker, but also save cost.
- Hence a systematic approach to the way documents are managed, can transform your Hospital resources to its highest utility and advantage.
- Many of the features, which you will read in the enclosure, are generally applicable to the word ERP, however integrating many other tools & utilities in this package makes it unique, productive, efficient and user friendly.
- Smartcom Infotech has facilities for Video Conferencing, Remote access to your server and other software system to emulate terminal at our end to understand the changes and communicate with you.
- Since the company has successfully implemented projects abroad, offshore support is always available with contractual maintenance of system.
