

Dewsoft's
myKlinik

What is Dewsoft's MyKlinik?

Patient care has become increasingly complex with the widespread use of advanced technologies in routine care. Healthcare providers must keep track of a staggering amount of information -- and their failure to do so can have a detrimental effect on patient care. Dewsoft's MyKlinik (Clinical Information System) is a solution to this dilemma. It is designed to bring the management of patient data into the information age. It includes Out-Patient Management, Doctor Management, Pharmacy Store Management System, Laboratory Information System, Electronic Medical Records and Billing Module.
