

Intelligent Retail Business Solution

Shopping
Redefined

Overview

Dewsoft Solutions is part of a putative business group in India engaged in various manufacturing, trading & consulting activities.

With a clear focus on identified industry domains and consistency of delivery, Dewsoft has carved a niche in the IT Solutions and Services Industry.

The key in engineering generic business solution for a client is looking it from a business perspective, not a software perspective. For doing so, we transgress software development and enter the realm of business application development. This clear understanding has guided us towards success, both for our clients and for us.

Vision

“ To create delighted clients and become a globally respected corporation that provides best business solutions by leveraging technology and human assets.”

Mission

“To create a fair and honest environment in the organization, which would drive our employees, vendors, clients and society at large towards achieving our vision.”
